**Label Information**

Label Size: 0.5" x 2.0"

Text Size

Need Help? (8pt, Bold)

Assembly Number, Serial Number, Revision: (7pt)

Development Systems Info Line (7pt)

1-800-755-2345 or 480-792-7302 (7pt)

Graphics

Microchip Logo provided as a true type font. (~24pt)

Label Data

Need Help? (10pt, Bold, Centered)

www.microchip.com (8pt, centered)

1-800-755-2345 or 480-792-7302 (8pt, Centered)

Assy# (9pt, Left)

Serial# (9pt, Right)

Part Number

Part Number of the assembly that calls out the label

Revision

R1 - Revision of the assembly that calls out the label

Serial Number:

JIT- Manufacturer ID

95 - Year (95....)

28 - Work week product shipped (01-52)

1 - Lot number (1-9)

0001 - Sequence Piece Number (0001 - 9999) Starts over with each new lot number.

Location

The 08-00126 label is to be located on the assembly that calls out the label.

Label Information

Label Size: 1" x 3" (Deviations need to be approved by Microchip)
Brady: THT-18-423-3

Text (Times New Roman)

Product Description: ~10 Point
Part Number Data, Serial Number Data: 10 Point

Part Number & Description are provided in the header area of the 14-xxxxx final assembly BOM for the product that this label will be attached to.

Barcode Information

Barcode is **Code 39** format (3 of 9)
Barcode Height is 0.150"
Ratio is 2.5:1 (Deviations need to be approved by Microchip)
Density is 5.29 cpi (Deviations need to be approved by Microchip)
Text is Times New Roman (Deviations need to be approved by Microchip)

Serial Number:

JIT- Manufacturer ID
95 - Year (95....)
28 - Work week product shipped (01-52)
1 - Lot number (1-9)
0001 - Sequence Piece Number (0001 - 9999) Starts over with each new lot number.

Graphics

None

Location

This label is attached to the outside of the cardboard product case. This label **should not** be attached to the top or bottom of the product case.

Vendor to insure that the serial number corresponds to the serial number assigned to the main electro-mechanical assembly contained in this product case. Except this label drops off the last two characters representing the rev level of the main assembly.
